Application/ installation Guidelines

In the decorative panels industry most of panels are introduced in the market as wall panels. Decmore panels are designed & developed as art panels with high finish so that a designer can easily apply the panels as on walls, as well as in furniture also to facilitate a concept designing.

Back side of Panel

Adhesive

Apply a generous even coat of adhesive to the product, immediately wipe off excess glue with a soft damp cloth, and dry with clean soft cloth afterwards to avoid adhesive from getting in front of the product. Being extra careful to avoid damages on sheet's face surface, apply the decorative panel after polish and finish work has completed. Please apply paper tape on side by side to fix the sheet perfectly.

Cutting & Trimming

To avoid damage, don't use hand saw. Sheet surface must be face-up when cutting, to avoid chipping, trim with cutting machine (Circular saw min, 6000rpm).

Cleaning and Care

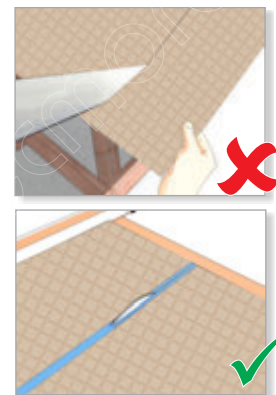

Wipe the area using a soft cloth.

Nailing & Drilling

For fixation panels avoid nailing and if it is necessary be careful to nail in the right place without damaging design.

Seam

If gaps occur at the joints, use approximate colour fillet. Immediately remove any excess filler. Wipe off but avoid scratching the surface.

*Being a processed and handmade product , the colour may vary slightly.
