GENERAL USE & CARE GUIDE
ACRO GLASS laminates are easy to maintain. With proper application and appropriate care, our laminates will last through the years.
- Cleaning should be done with water and a clean, non-abrasive cloth.
- To remove more stubborn stains, use mild household glass cleansers like Colin. Gently wipe the surface with a non-abrasive cloth.
- Avoid the use of abrasive liquid cleansers, bleaching compounds or solution as these may damage the surface of the laminate.
- Do not place hot cookware directly on the laminate. Prolonged exposure to temperatures above 30 degree Celsius may cause damage to the laminate surface.
- Glossy surfaces are recommended only for vertical application.
- Do not use thinner on the surface of the ACRO GLASS laminates.
- Recommended to store the laminates at temperature below 30°Celsius.

INSTALLATION TIPS:
- Stir the LUXEBOND adhesive before using it, and do not mix water in adhesive.
- Clean the dust particles from the surface of the base substrate (Plywood, MDF, Particle Board) by cloth, soft brush, sponge or sand paper.
- Spread the adhesive uniformly by brush, roller or adhesive spreader on both ACRO GLASS laminate and base substrate (Plywood, MDF, Particle Board).
- Leave at least 2mm of groove between two pieces of ACRO GLASS laminate, so that at the time of pressing it will be easy to remove air from between the ACRO GLASS laminate and base substrate (Plywood, MDF, Particle Board).
- Use soft pinch roller or normal pressing technique at the time of pressing ACRO GLASS laminate on the base substrate (Plywood, MDF, Particle Board).
- The pressing should be done from the middle of the panel and move towards to the side line and corners of the panel.
- Make sure to give sufficient amount of pressing to ACRO GLASS Laminate for almost 12 to 15 hours to achieve full bonding strength.

IMPORTANT INFORMATION: TO AVOID AIR BUBBLES:
Reasons leading to air bubble problems are as follows:
- Bonding of Acrylic laminate under high humidity environment.
- Using of incorrect adhesive type may also lead to air bubble after the installation. We recommend using LUXEBOND adhesive.
- Due to uncertain weather conditions, base substrate (Plywood, MDF, Particle Board) may absorb moisture. After few days of installation, base substrate gradually loses moisture resulting in air bubble formation between acrylic laminate and substrate.
- Using uneven surface substrate (Plywood, MDF, Particle Board) may lead to air vacuum and air bubble may appear after the installation.
- When more than 8’X 2’ of Acrylic laminate is used for panelling, it may lead to air bubble formation after installation.
- Lack of bonding/pressing time during the installation of Acrylic laminate may lead to air bubbles.
- ACRO GLASS sheets should be kept evenly straight. If the sheets are in roll form, it should be kept straight for minimum 48 hours and then you can press and laminate the surface for better results.

TO AVOID YELLOW PATCHES AND COLOUR FADE PROBLEM:
The reason behind yellowing/colour fade problem areas follows :
- When laminate is exposed to direct sunlight, it may cause discolouring, fading and yellowing of the laminate.
- Use of inferior quality of Dipped plywood /Dipped lipping Patti can react with adhesive which may cause yellow patches after the installation.
- Using of synthetic rubber adhesive (SR / JatPat, Bostic, Heatex) may lead to brown / coloured patches on acrylic laminates. We recommend using LUXEBOND adhesive.
- Prolonged exposure to temperature above 30° degree Celsius
- Placing hot cookware directly on the Acrylic laminates may cause patches on the surface.

LIMITED WARRANTY
Euro Pratik Products are reasonably free of defects and when properly handled and fabricated will comply, within reasonable deviations to applicable manufacturing specifications. Clients are advised to inspect products thoroughly prior to installation. Euro Pratik warranty will not cover defects and non-compliance from and or otherwise attributable to any other causes, including without limitation:

- Improper handing/transportation/storage of the products
- Improper installation of the products
- Improper and unintended usage of the products
- Lack of or improper maintenance of the products
- Exposure of the products to extreme temperatures
- Unauthorized alteration to the products
- Outdoor Applications

NO GUARANTEE AND NO EXCHANGE IN ANY CIRCUMSTANCES
THERE CAN BE COLOUR VARIATION IN MATERIALS FROM DIFFERENT BATCHES
IT IS ADVISED TO USE SAME BATCH MATERIAL TO AVOID COLOUR VARIATIONS
ACTUAL COLOURS OF THE SHEET MAY VARY FROM THIS BROCHURE
ABRO TAPE USE NOT RECOMMENDED
